

SAT QUERY AI — SCIENTIFIC ANALYSIS REPORT

Smart India Hackathon 2026 — SIH26167 Earth Observation Intelligence Workstation

EXECUTIVE SUMMARY

User Query: Analyze this satellite image and identify the dominant land-use categories. Estimate the relative proportion of built-up, vegetation, agricultural, and water-covered regions, and identify which category is spatially dominant.

Executive Answer: The primary water body is a meandering main river channel (~500m wide) flowing north-to-south through the center of the scene.
