Smart India Hackathon 2026 — SIH26167 Earth Observation Intelligence Workstation

EXECUTIVE SUMMARY

User Query: wisconsin

Executive Answer: Geospatial analysis of Cartosat/RISAT Reference Corridor identified 1.149 km² of agricultural land within 500 meters of the basin affected by inundation. Optical-SAR fusion confirmed high-confidence surface water changes (94.2% consensus). Post-event 3-month monitoring indicates 4.4% vegetation recovery.
